

Accelerating Innovation: How Data is Redefining the Future of Mobility

Imbibe what is not innate

It is important to know just "Doing" digital is not the destination

Data transformation is to construct

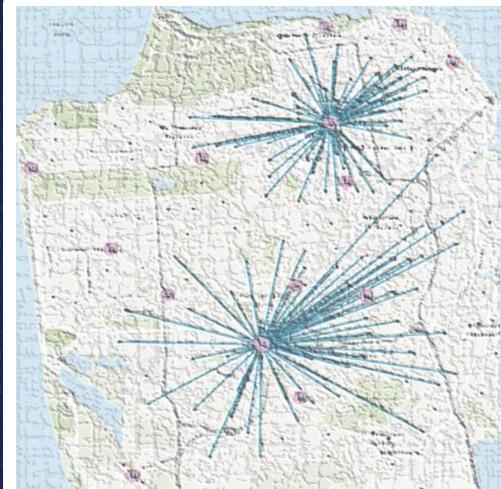

an optic layer to look through the data

BUSINESS DRIVERS	BUILDING BLOCKS		CONSUMPTION	
Build Analytics & reporting capabilities and create robust data layer	DATA S 10 SYSTEMS & APPLICATION TO GET &	0 + srouces 0 + give data/insights/information	dashboards	
Data Ingestion with volume and velocity Develop organization wide reporting layer	DATA COLLATION Data to be orchestrated across 20+ data sources across systems, POS and other functional applications 2.7 TB data 10 GB daily volume 900+ tables	DATA TRANSFORMATION Data Modelling Build use case specific data marts to optimize across specificity & scale 50+ data marts operating from YY GB pool of data	12+ Analytical models	
Progress diagnostics to prescriptive to predictive model for strategic and tactical interventions	 DATA OPERATIONS Nimble & light structure to respond to evolving systems and requirements to suit business Complete DevOps setup to ensure relevance 	DATA INTEGRATION Seamless integration across data source to consumption layer & feed-back to data layer 	 Informed decision making Improved efficiency Enhanced customer experience 	

DATA UNPLUGGED FUTURE OF DATA NOVEMBER 29, 2024 | GURUGRAM, INDIA

Data First, Al Next

Network Analytics

How to expand service network to ensure:

- Capacity utilization
- Improved customer experience
- Service profitability

Data First, Al Next

Network Analytics

Insights & nuanced observation

Relevant & fitting solution

Its key to be located within 6-7 kms of distance

from customer as serv ice behavior is distinctly

different from customers within & outside 6-7

kms distance

Service profitability is strongly corelated to

existing customer base and market potential

Data led assessment of :

- 1. Existing customer penetration
- 2. New market potential
- 3. Service behavior of customers

Recommended service locations at

5 X 5 KM granularity across major 20 cities in India

Service fulfillment rates increased by ~20%

Prospect Analytics

How to I know how probable a prospect is to convert ?

Data First, Al Next

Prospect Analytics

Insights & nuanced observation

Relevant & fitting solution

On an average, a Mumbai prospect is ~ 1.3 times more likely to purchase compared to Chennai prospect

Even across digital channel, conversion behavior significantly differs based on the source from where enquiry is generated (UTM source, campaign etc.) Built a lead scoring model which includes:

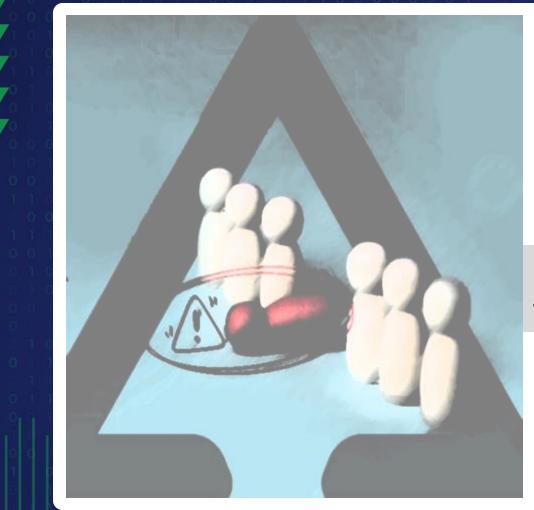

- Building prospect one view
- End to end integration of systems for data & output flow
- Daily sync with field team with guidance on quality of

leads

Avg conversion from 'high probable' prospect set is ~1.5x the average conversion

Customer Analytics

How do we improve customer retention from free to paid service regime ?

Data First, Al Next

Customer Analytics

Insights & nuanced observation

Relevant & fitting solution

Glue number for service regime is around

5-6 paid services depending on type of vehicle

20 days prior to service due, is where nudge works the best among other communication touchpoints

Predictive model to identify those 'Who are less

likely to come for paid service' and design

campaign to sufficiently communicate at the right

time with right tonality and content

~25% incremental service redemption

Data First, Al Next

Business Analytics

Solving Chetak's low market share problem in Bangalore

Data First, Al Next

Business Analytics

Insights & nuanced observation

Across the pre-purchase journey **'Consideration'** phase saw highest opportunity to improve specific to the city

- The interest profile of Bangalore customers was distinctly different compared to other cities
- The profile is more family oriented in Bangalore with less preference from younger population compared to other cities

Relevant & fitting solution

A holistic assessment of :

- Target group
- Rol computation
- Market Scenario
- Pricing & product
- Network Adequacy
- Customer experience

7 recommendations across 4Ps with suggested with objective action plan

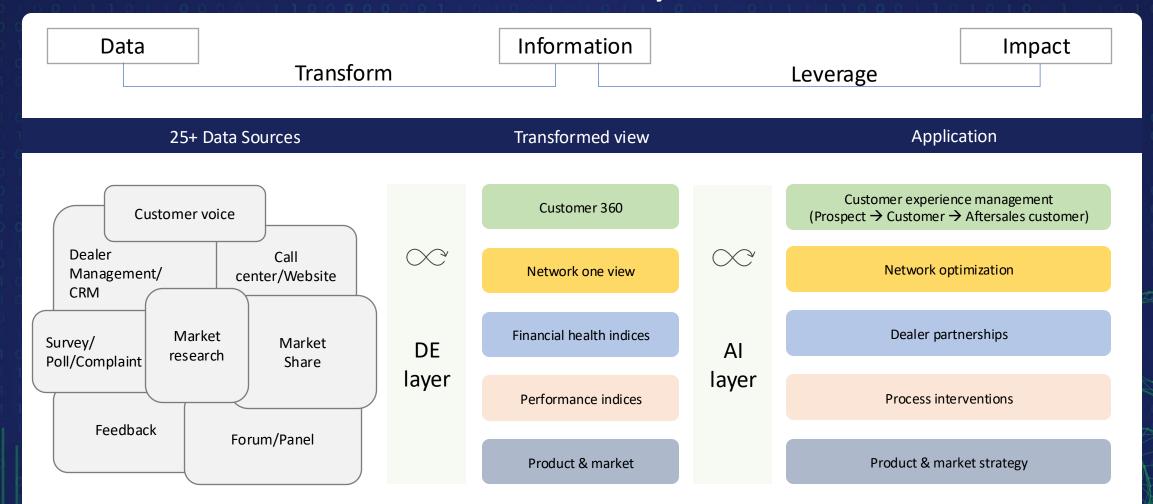

Market share saw ~7%-10% growth over next 3 months post alignment on identified actions
