

# The AI Moment in Context & Creative

Speaker Name : Rahul Joshi

Speaker Company : Silverpush

**AI breakthroughs are changing  
how we interact with tech**

## Maximizing Ad Impact with The Power of Context and Creative

While current in-market advertising solutions work, they may lack a few steps to reach the desired outcome.

Utilizing the power of context and creative, enhances the ad's impact leading you directly to the desired outcome.

# AI is Transforming How Brands are Targeting

Let's learn about the AI-Powered Advertising Targeting Solutions

## Enhancements With AI in Targeting

### Hyper-Contextualization

From broad strokes to laser-focused precision, advanced AI seamlessly enhances targeting to each individual's **context**, radically transforming the advertising landscape.

## Video-Level Analysis for Advanced AI Targeting

Now advertisers can move beyond basic channel or video categorization.

Advanced AI solutions offer a **360-degree approach**, analyzing entire videos, including content, performance, channel authenticity, creator information, and online footprint for hyper-relevant ad placement.

The screenshot displays a YouTube video player with an overlay of AI analysis results. The video shows a woman in a gym setting. The analysis interface includes the following sections:

- Context**
  - Celebrity Identified - Lee Chung
  - Brand Identified - Han Hye Jin
  - Object Identified - Dumble
- Semantic Analysis**
  - Healthy Routine
  - Healthy Living
  - Staying Healthy
- Channel Authenticity** (indicated by a green checkmark)
- Video Metrics** (indicated by a green checkmark)
- Brand Safe** (indicated by a green checkmark)

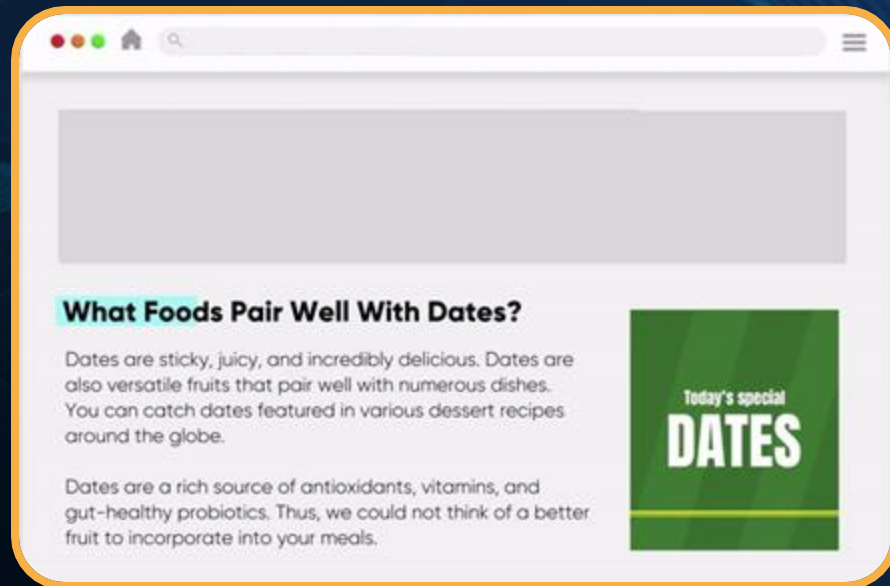

Additional video details shown include:

- Positive Verbiage:** "It is gondre rice and it's good."
- Channel:** Han Hye Jin (684K subscribers)
- Video Title:** Revealing The Easiest Method To Achieve 8kg Body Fat In 14 Days By Han Hyejin | Diet, Meal Plan, Maintainer, Body Profile
- Views:** 1,112,435 views
- Date:** Sep 9, 2023
- Engagement:** 21K likes, Share button

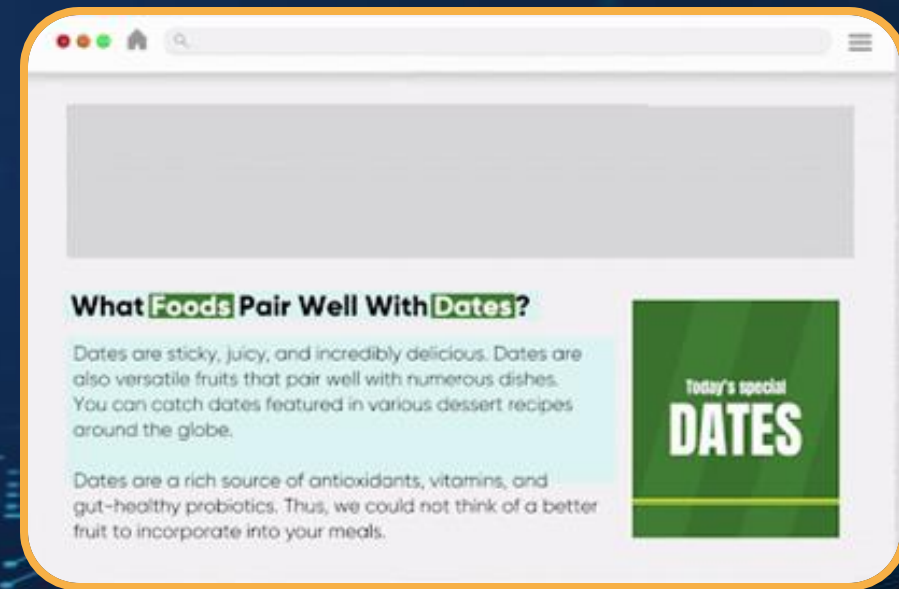

## Utilise LLM to Understand Context Better

Advanced AI targeting utilizes **deep learning** to analyze extensive data, identifying patterns and hidden insights within language. **Natural Language Processing (NLP)** further enhances this by understanding context and intent, ensuring highly relevant ads are delivered at the right time.

### Keyword Targeting

### Leveraging NLP to Identify the Semantics of the Content

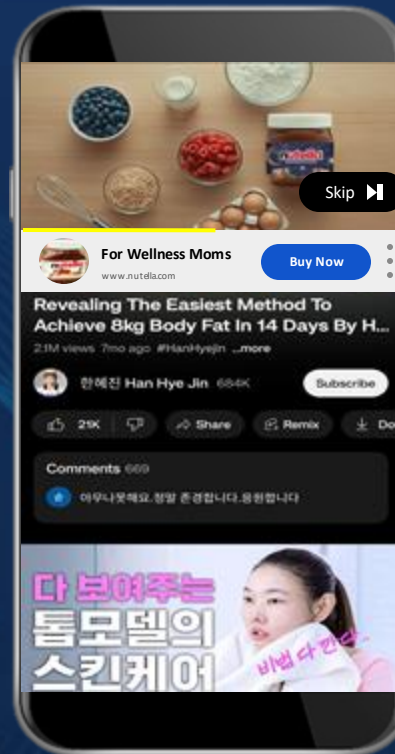

## Redefining Personalisation at every step with Advanced AI

Craft targeted campaigns for specific niches using **Dynamic CTAs**.

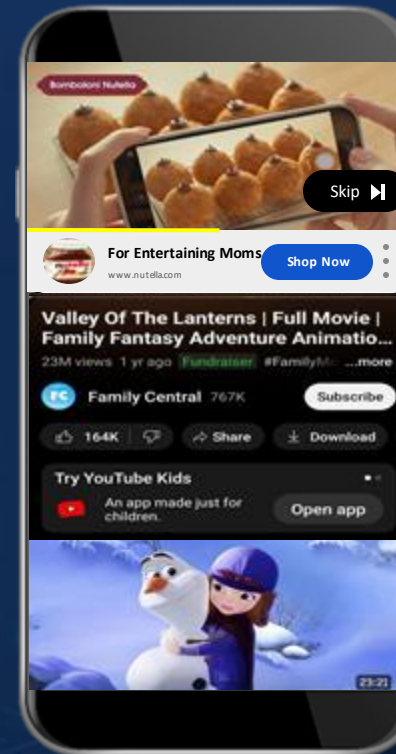

Increase engagement with personalized communication that resonates with the intended audience.

### What's happening here?

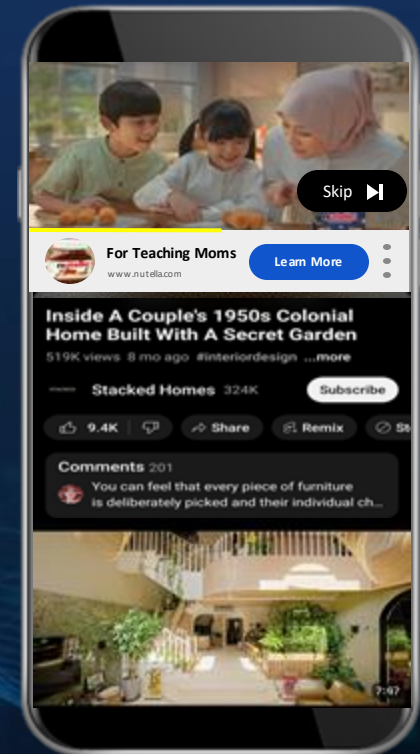

Nutella brand is utilising Dynamic CTAs for targeting different audience segments.

Modern Wellness Advocate

Trendy Moms

## AI Identifies 'Made for Kids' Content for Enhanced Suitability

Advertisers can utilize AI algorithms to identify kid-friendly content by analyzing factors like themes, language, visuals, and audience engagement, while also considering metadata, demographics, and user data to determine suitability for children.

Not made for kids content

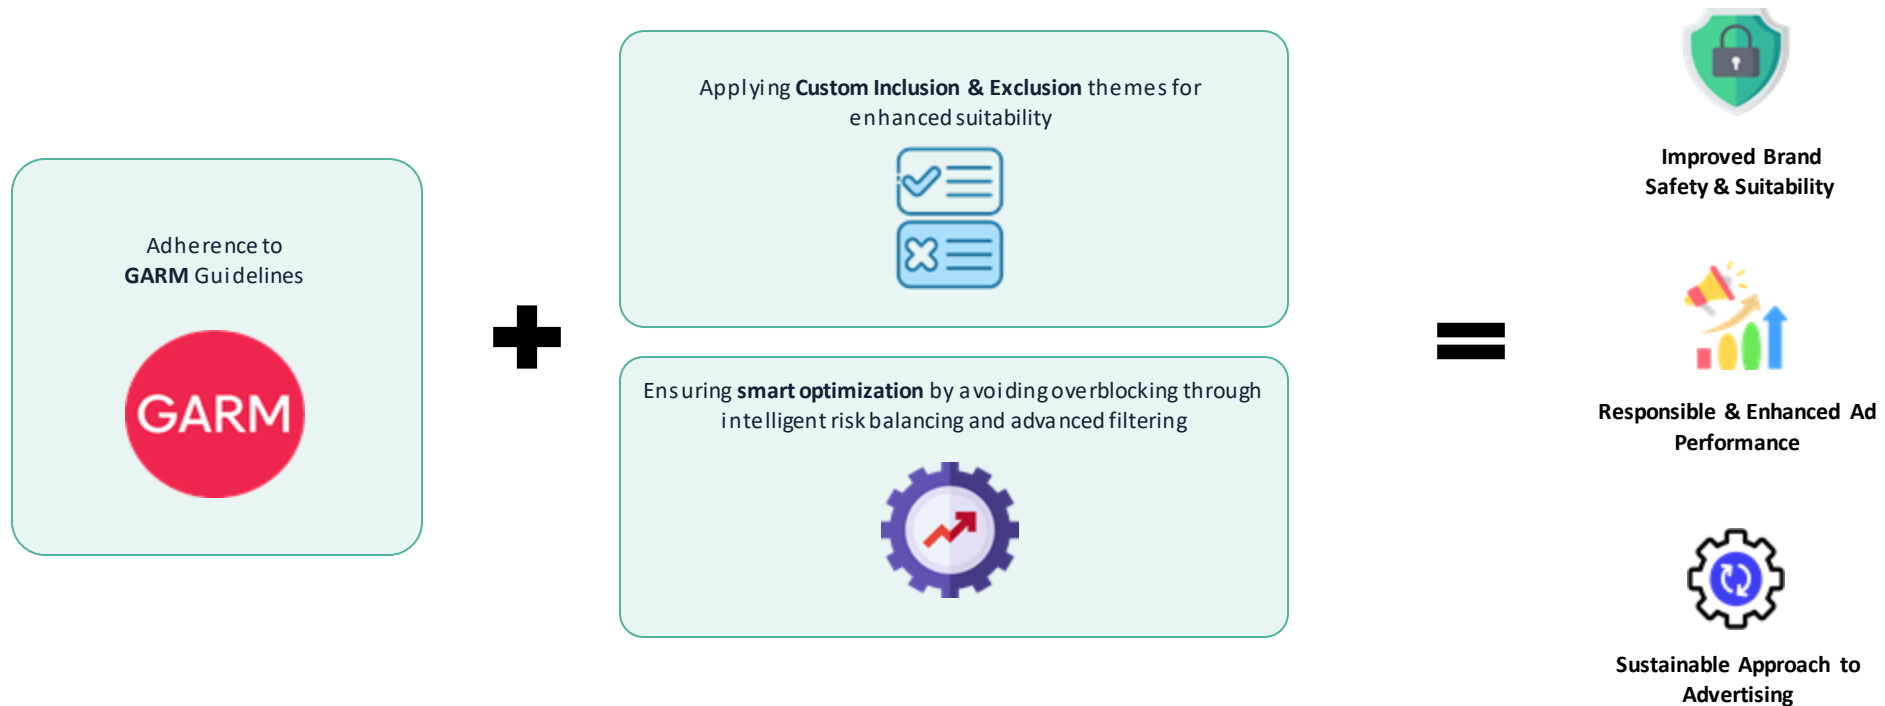

Made for kids content

**84% of kids say YouTube is the main way they consume video content, with 40% of kids spending up to two hours a day on YouTube.**

# AI Enhances Safety and Suitability With Custom Inclusion/Exclusion Themes

Brand safety and suitability are crucial for advertisers and brands alike. AI-driven advanced contextual solutions adhere to industry guidelines and utilize custom exclusion and inclusion lists and smart optimization ensuring optimal ad experiences for each campaign.

# AI is Transforming How Brands are Communicating

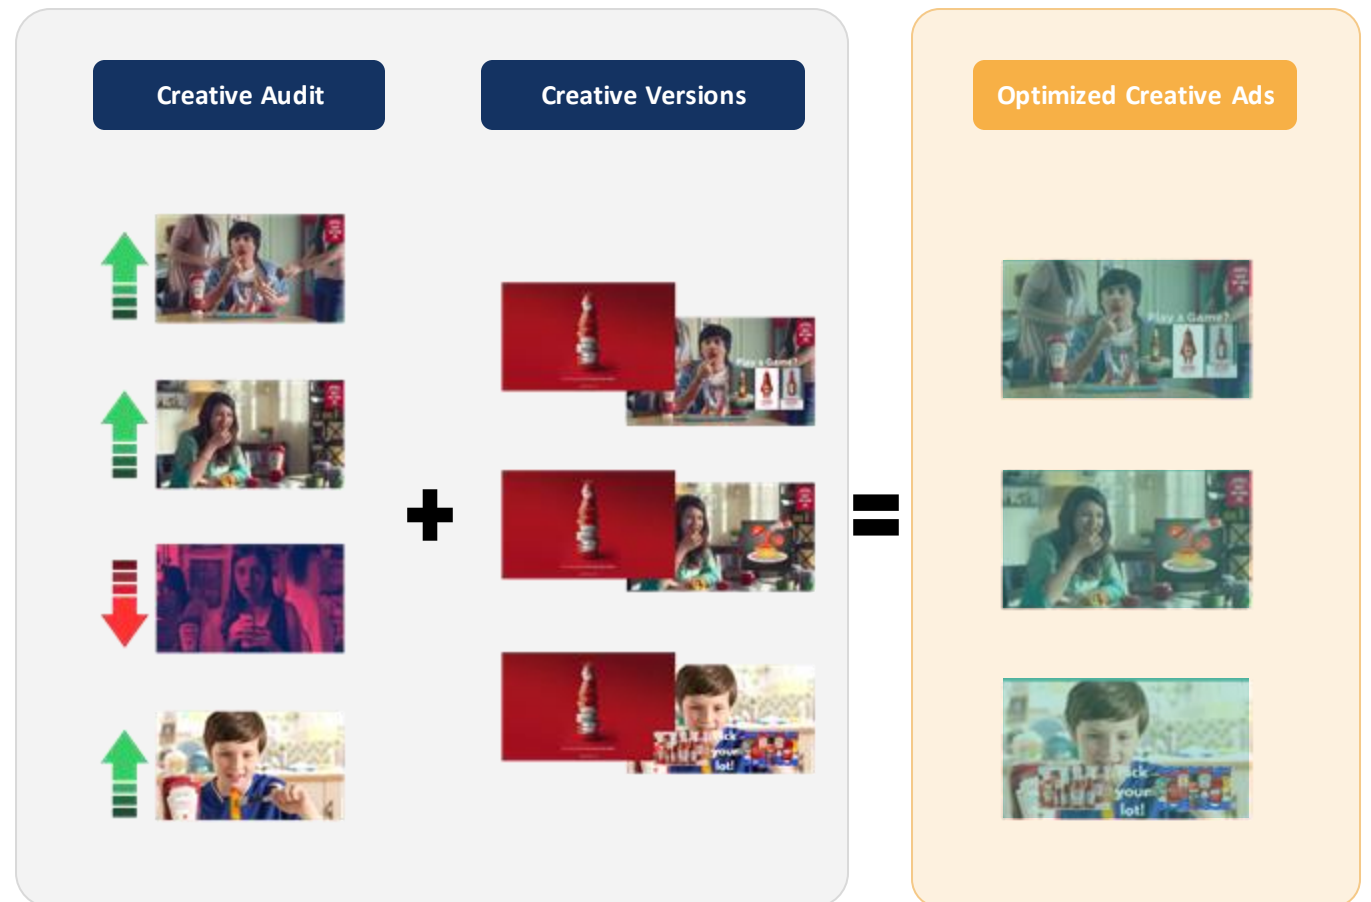

Let's learn about the AI-Powered Advertising Communication Solutions

## Enhancements With AI in Communication

### Creative Powerhouse

Go beyond creative and become a data-driven powerhouse.

The advanced AI extracts valuable data to create multiple versions of your creative with interactive elements and CTAs, then optimizes the best-performing ones.

## Take a Leap With Creative Innovation: Interactive Ad Formats

AI-powered algorithms enhance interactivity with features like interactive hotspots, branching narratives, adaptive storytelling, and gamification while also providing data-driven insights for continuous optimization and personalization, boosting **effectiveness of video ad campaigns.**

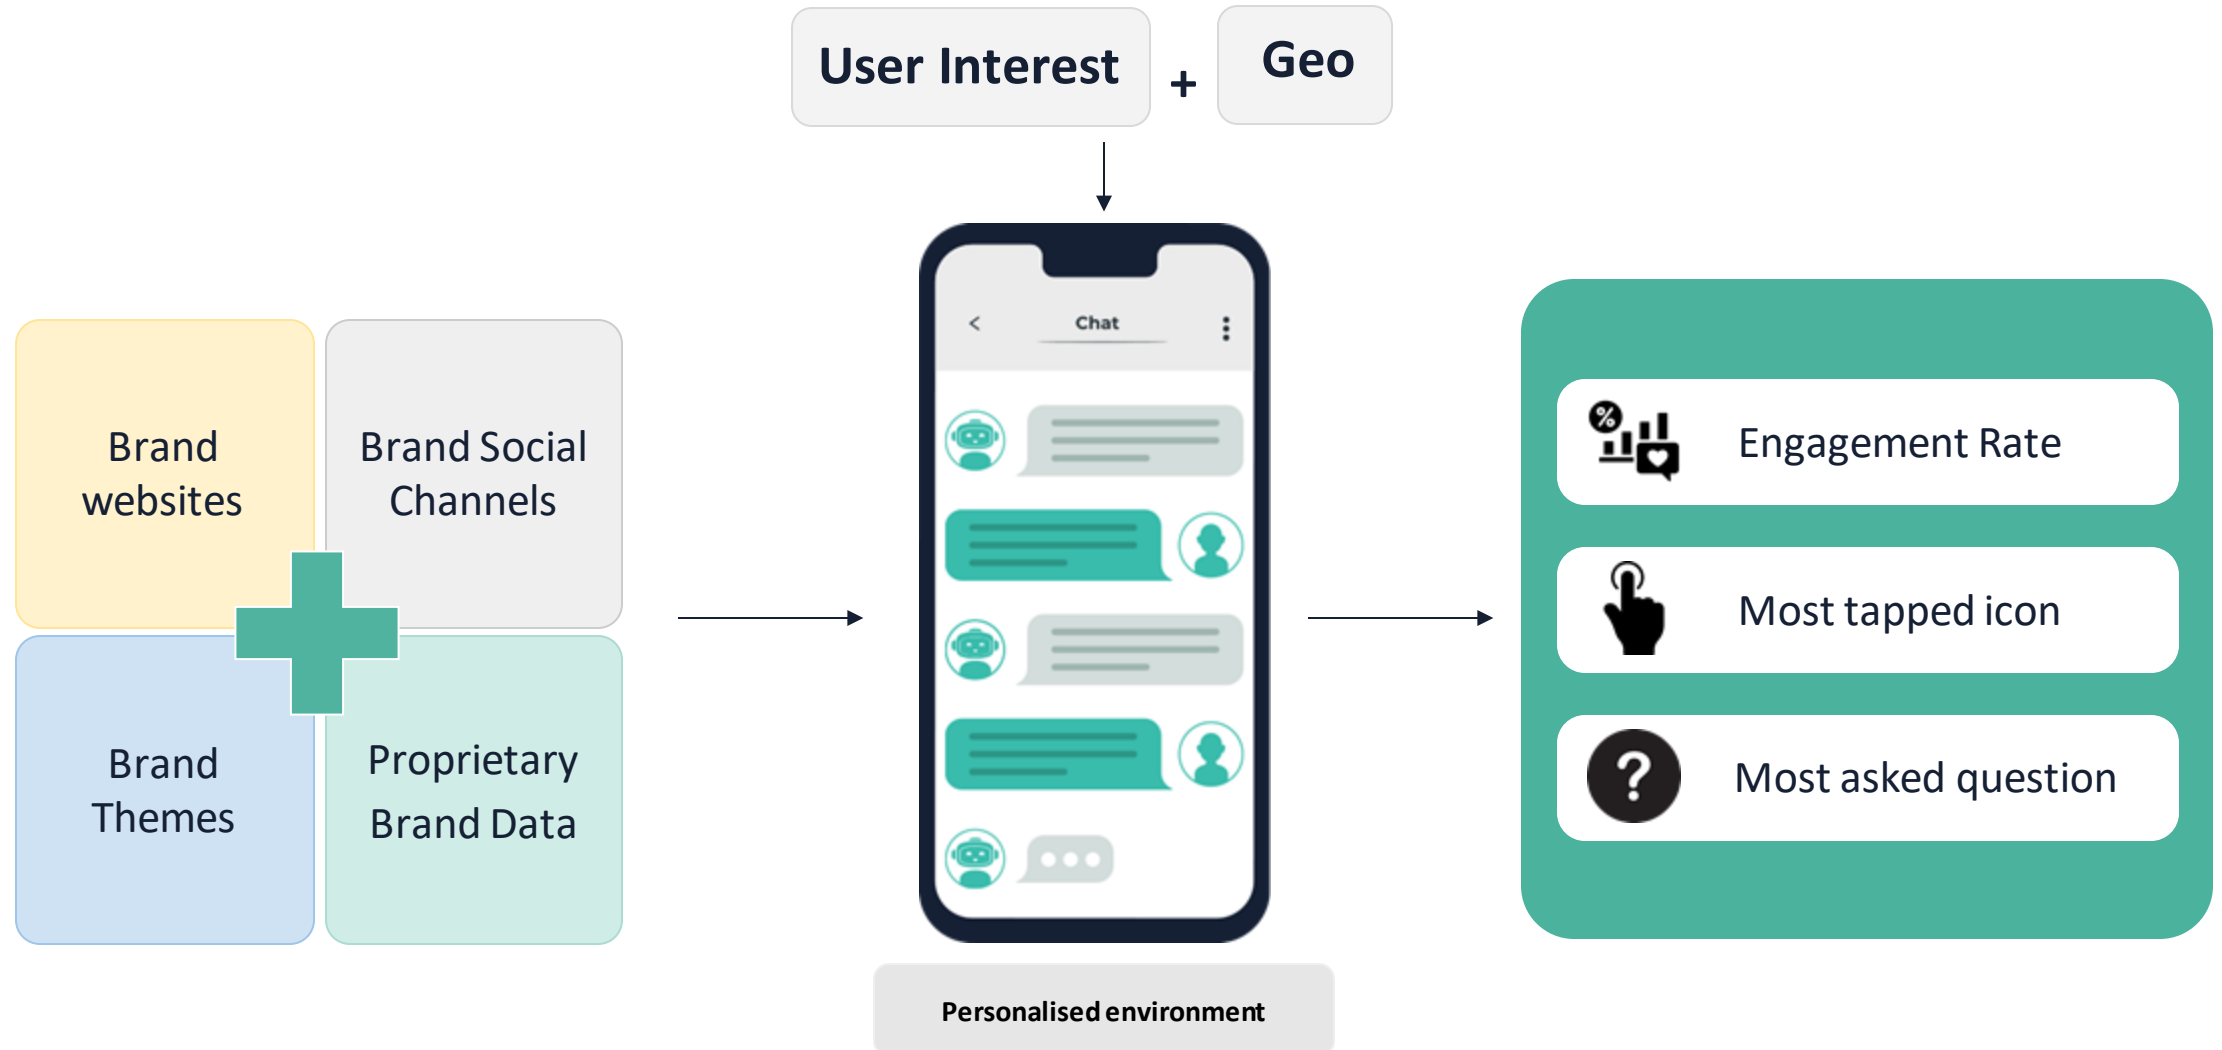

## Develop Human-Like Dialogues With Conversational AI

AI-driven conversational ads lets you have real human-like personalized brand-to-customer conversations.

It cuts through the clutter, by providing instant solution to consumers accelerating their decision-making process while filtering out-of-context conversations.

## How does it work?

# Conversational AI: Absence vs Impact

Advanced AI that understands you - assists with personalized recommendations and instant help, every time

## Without Conversational AI

Non-Personalised environment

Non creative/interactive experience

Robotic conversations

Only text-based conversations

## With Conversational AI

Personalised environment

Creative and interactive experiences

Human like conversations

Conversation can include image, videos, links etc

## A Use Case of How a Leading Automobile Brand Utilized AI Moment In Context And Creative

### Objective:

Wanted to opt for a conversational automation strategy to drive customer engagement.

### Results:

Viewability: 86%  
Engagement Rate: 9.2%  
Leads Generated: 70+

silverpush

### Strategy:

Audi strategically integrated an interactive chatbot into their existing video asset, placing it within the appropriate context when users were searching for high-end electric vehicles.
